Student

Jamf School gives
students restricted
permissions over their
own devices

Parent

Jamf School provides
management controls
for parents

Short explanation

Mobile Device Management

Mobile Device Management (MDM) is the umbrella term for a software solution for the configuration and centralised management of mobile devices such as computers, tablets and smartphones. A large number of devices require a simple and straightforward management solution, particularly in a school environment.

All devices are conveniently wirelessly managed no matter where the device is located. Through a central server, a secure connection to the devices is established via the internet and the devices are managed by means of an interface.

MDM solutions provide teachers and IT administrators with a convenient tool to administer devices for individual students, school classes or even multiple institutions. For teachers it ensures control over all devices when delivering digital lessons.

Why Jamf School?

Advantages at a glance

Jamf School is a powerful and affordable MDM for the modern, digital classroom.

The system was built on ZuluDesk technology, originally developed in 2014 in a school in the Netherlands. Now educational institutions in more than 50 countries rely on it.

Jamf School allows easy management of all Apple devices. It provides simple tools for IT departments, teachers and parents.

In conjunction with Apple's new iOS 13, Jamf School is the best MDM choice for educational purposes. The inventory, deployment and security of every Mac, iPad, Apple TV and iPhone in any school is easily managed, and the system integrates with existing IT solutions with an ease never before possible.

Ease of use

Jamf School has a clearly laid out interface. Mastering app, profile and document deployment is expedited with a consolidated menu system; no wading through layers of submenus. Installation and configuration is conducted by Jamf School partners. This can be done onsite at your school or remotely.

Integration of Apple services

Existing Apple services, such as Apple School Manager (ASM), Apps and Books or Automated Device Enrollment can be conveniently accessed through Jamf School.

Control in the classroom

Fewer distractions, better learning. Jamf School allows complete control of all devices in the classroom with the ability to block apps, web pages and features such as spell check.

Data protection and hosting in Europe

We take your data security and privacy seriously. All our servers are located on AWS in Frankfurt, Germany and abide by the European Union General Data Protection Regulation (GDPR).

Cost effective for education

The price structure of Jamf School is simple and transparent. Each individual device license costs only \$9 AUD* or \$9.5 NZD* per year, with all updates included.

* All prices exclusive of GST

Anonymous data

Jamf School can keep your data safely on our European servers when synchronising users and classes with Apple School Manager by replacing user details with random data.

Innovative apps

Jamf School offers innovative apps with a variety of helpful features designed specifically for teachers, students and parents. Use the apps for free under the Jamf School license.

For IT Admin

A scalable and intuitive solution

The growing number of mobile devices in schools require scalable and intuitive IT admin solutions.

Jamf School offers a powerful management system that allows you to manage an unlimited number of devices. Whether a single school or a school network, Jamf School is the perfect solution.

Jamf School Dashboard

The dashboard offers a comprehensive, convenient, quick overview. It's easy to keep track of all managed devices, users, popular apps and more.

Device and user management

Users, user groups and device groups are easily created and managed. It is also possible to view in-depth information and perform diagnostics on individual devices.

Location support

Having to manage multiple locations or schools is no problem with Jamf School. With location support, you can easily manage each location and its associated devices, users and groups separately.

Active profile management

Jamf School supports various profiles for students, teachers and other employees. Layouts for devices, restrictions and more can be created.

Class management

Classes can be easily managed by dragging and dropping the required apps and content and creating restrictions. Teachers can request apps from Jamf School which are then shared with the IT admin.

Jamf School Incident System

This powerful tool helps the IT department manage issues with devices. Register damaged iPads and upload photos or additional documents to assist with warranty or insurance claims.

iBeacon profile assignment

This feature enables automatic assignment of profiles using iBeacon technology. For example, when students enter the chemistry room, suitable apps and educational materials are automatically displayed on their devices, while unrelated content is hidden.

Free updates

All updates and newly released apps are included as part of Jamf School license usage.

AirPrint printer management

AirPrint technology enables documents to be printed without installing printer drivers. Jamf School seamlessly supports this technology.

For Teachers

Jamf School Revolutionises Teaching

The Jamf School Teacher app is designed to meet the needs of school teachers. The app makes it possible to quickly and easily control and manage Apple devices.

Jamf School Teacher complements Apple's own Classroom app so the advantages of both systems can be conveniently used together.

Prepare lessons

The prepare lessons feature makes it easy to prepare lesson profiles containing apps and web pages provided to students during class.

Control access

Prevent the access and use of selected device functions. The teacher effectively controls notifications, camera functions or the use of web pages, hence limiting student distraction.

Temporarily restrict app usage

Only apps on the allowed list will be available to students on their iPads. All other apps and associated notifications are temporarily hidden.

The attention screen

To get the undivided attention of the students, Jamf School provides the attention screen. By pressing a button, it is possible to lock the students' iPads and display a message if required.

Time-based security

Time-based and permanent restrictions allow the use of iPads in exams.

Write messages

The Jamf School Teacher app keeps students up to date. The messaging feature allows teachers to communicate with individual students or groups.

Device information

General information can be provided on request for each selected student device. For example, the battery level of a particular device can be easily determined.

Easy use of Shared iPad

With a simple QR code scan, iPads can be assigned profiles. Thus, individual devices can be conveniently assigned to different users. The users know which device to use, as their picture can be seen on screen. After signing in, they will find their homework, apps and assignments exactly as they left them.

Teacher Online web app

As an alternative to the iOS app, the Jamf School interface is also available online via a web browser. Lessons can also be easily prepared off-site without an iPad.

For Parents

Be active and aware

Jamf School is used by teachers in schools worldwide to control Apple devices. Better learning through fewer distractions.

With Jamf School Parent, parents can participate in their children's school life and easily control their children's devices.

The use of the Parent functions (app or web-based) gives parents tools to bring focus to homework for a set period of time.

Modify access to games

Jamf School offers parents time-based and access control to games and non-essential apps on their children's iPads.

Restrict communication

With simple settings, the use of programs such as iMessage, WhatsApp and Messenger is safer and more controlled.

Control social media

Jamf School allows parents to set rules that limit the use of social media such as Twitter, Facebook or Instagram to specific times during the day.

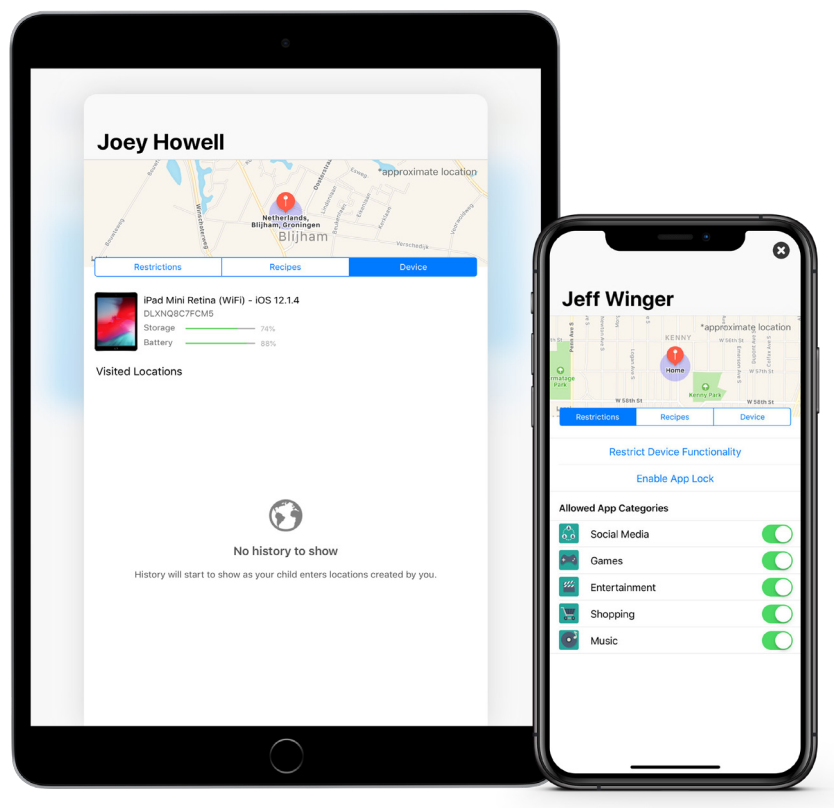

Location notifications

The app informs parents about their child's arrival at school and with their return home.

Safety feature

Jamf School includes a motion sensing feature whereby notifications are automatically turned off - for instance, when a child is cycling or walking - thereby reducing distraction and assisting road safety.

For Macs

Jamf School for macOS

Jamf School brings you macOS support: brand new applications and features to make Jamf School with best MDM solution for macOS in education.

Of course, you want to make it your personal device. Jamf School gives you the option to customise your macOS device with pre-approved settings and programs via the Jamf School Self Service app.

In case you've lost your macOS device, we can help you with that!

Where's my Mac?

Finding lost macOS devices is now easier than ever. Lock devices and optionally issue an alert at full volume.

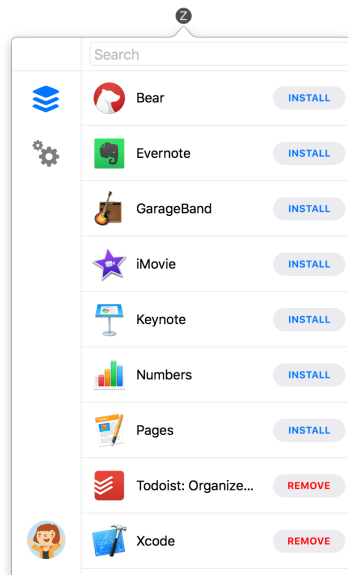

Restrict your lost macOS device until it is returned or found.

Jamf School Self Service

Jamf School Self Service gives the user more control over their supervised Mac device. Download and install pre-approved programs, documents and wallpapers to make your macOS device more personal.

Jamf School Scripting

With Jamf School Scripting you can run scripts directly from the Jamf School Management System, along with additional benefits, such as seeing the response, any error codes, and the time the script was executed.

Run custom scripts once, on schedule or at certain events such as on login or logout. Jamf School Scripting makes macOS device management even easier.

Spotlight

Privacy, Content Caching, Locations

Jamf School takes time to help you keeping your data secure and safely managed. Find out what is possible right now to protect your data.

Locations

Managing multiple locations or schools is no problem with Jamf School. Location support lets you easily manage each location and its devices, users and groups separately.

IT administrators can manage devices, users, profiles, apps, documents, Smart Groups and settings from within the same account. Also, unassigned Jamf School licenses can be transferred between different locations.

The synchronisation between Jamf School and Apple School Manager happens seamlessly. Just upload your Apple School Manager token and all Locations, students, teachers, staff and devices will show up correctly within Jamf School.

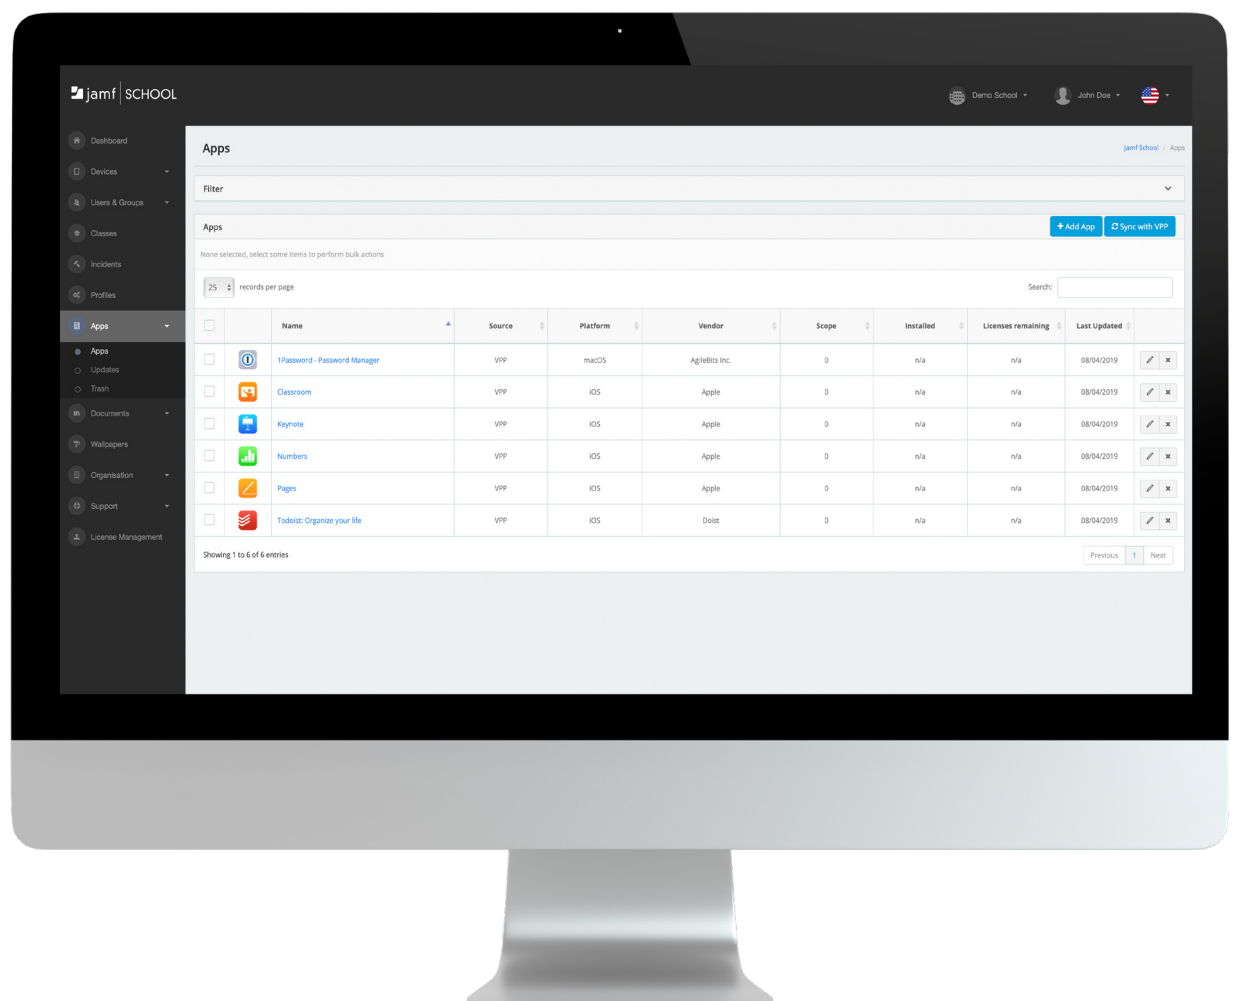

Compatibility

Jamf School and Apple services

Apple services significantly simplify the MDM setup process. They enable devices to be registered quickly and configured automatically and apps purchased and distributed directly.

Jamf School is seamlessly compatible with all Apple services.

It has never been easier to provide iPads and Macs for students and teachers.

Apple School Manager (ASM): Manage Apple IDs and Apps

Apple School Manager is a simple, web-based portal that can be used to assign iPads and Macs in schools to an MDM. It enables the creation and management of Apple IDs for all students and employees and makes it easy to purchase books and study materials.

Jamf School integration with ASM makes it easy to sync classes, students and teachers. iPads can be set up wirelessly. The setup and registration with the appropriate settings and restrictions requires minimal manual intervention. Devices and apps can be assigned according to the class groups as desired.

Apple School Manager includes Automated Device Enrollment and Apps and Books:

Apple Automated Device Enrollment: Device Registration

Automated Device Enrollment helps educational institutions easily deploy and configure Apple products by automating enrollment and supervision into MDM.

Automated Device Enrollment provides companies with a quick and streamlined way to deploy their organisation's iPads, iPhones, Mac computers and Apple TVs.

Apple Apps and Books: Distributes Apps in Large Numbers

The Apps and Books allows educational institutions to buy apps in large numbers and distribute them within their organisation.

Jamf School works closely with Apple to seamlessly integrate the Apps and Books portal with the Jamf School Management System.

Jamf School Licensing

Constant and transparent

Jamf School has endeavored to keep the licensing structure concise.

There are no hidden pricing incursions for updates or new releases, making Jamf School a reliable MDM solution for schools.

The pricing below is per device.

1-YEAR-LICENSE

\$9 AUD* | \$9.50 NZD*

Each managed device requires a license. This license is transferable if a device needs to be replaced. Includes Jamf Standard Support.

* All prices exclusive of GST

Complete package

A license provides access to the Jamf School Management System and the Jamf School apps, including all future features and updates.

100 % education

Jamf School is fully focused on education. This experience is reflected in all tools and functions. Jamf School knows what matters.

Local helpdesk

First-class support and customer service play a big role. Our friendly support team will help you quickly and competently with every problem.

Jamf cloud

Jamf School is cloud-based. New features, updates and apps are automatically available.
